Advanced MRI and CT imaging workshop: nerves, metal and more

Convenors: Dr Radhesh Lalam, Dr Prudencia Tyrrell

Date: 20th and 21st May 2019

Venue: Robert Jones and Agnes Hunt Orthopaedic Hospital, Oswestry Shropshire

Target Audience: Consultant radiologists (musculoskeletal and neuro), senior radiology registrars

This intensive two day course will cover various aspects of neurography and imaging around implants including technical aspects and clinical situations. The lectures and tutorials will be given by world renowned faculty members in small groups in a friendly atmosphere to allow participant involvement. The aspiration of the course is to equip participants with knowledge of what is currently achievable with widely available software. There will also be lectures and tutorials on new developments in these areas.

Due to the hands-on element of this course, numbers are limited to just 60

Register online via the website www.orthopaedic-institute.org

Registration Fee of £295 applies. Lunch and refreshments included
