Personal Statement

We all missed each other and wish to be back to our usual educational activities face-to-face as in the past. The current situation forced changes in the teaching and learning processes all over the world. Getting sharply adapted and with the hard works and dedication of many colleagues, activities could be able to come real through our computers.

It's my privilege to apply the chairperson position. If elected, I would like to serve the subcommittee with a view to interchange and disseminate the knowledge with the collaboration of all of the members. Experiences of the previous chairpersons and the senior members will always be precious.

Respectfully.
