WELCOME ADDRESS

The Winter School Musculoskeletal (MSK) Radiology is an intensive course aimed to promote international exchange of ideas, experience and knowledge about MSK Radiology, offering specific skills in the field of imaging.

The course is held in English language and the target audience is composed by 40 to 50 delegates, including residents, fellows and clinicians.

The course is organized by Giuseppe Guglielmi, full Professor of Radiology at the University of Foggia, Italy.

The course is endorsed by the International Office of University of Foggia, by the European Society of Musculoskeletal Radiology (ESSR) and the Italian Society of Medical Radiology (SIRM).

In the morning, the faculty members will present their lectures, covering most of the musculoskeletal topics, including degenerative bone diseases, osteoarthritis, trauma, tumor, osteonecrosis, benign and malignant vertebral fractures, metabolic bone disease, rare diseases, osteoncology, infection, muscle/nerve imaging, interventional radiology and sports injuries, in particular injuries and overuse lesions of the axial and appendicular skeleton, described by plain radiographs, US, CT, MRI, PET-CT and bone scintigraphy.

In the afternoon, the participants will be divided in groups and will follow their tutors in case presentation sections and hands-on ultrasound sessions.

The meeting is not only a didactic opportunity; thanks to the wide variety of activities designed for the participants, moreover it represents a social moment to share with all participants from all over the world.

The Musculoskeletal Winter School of Radiology will take place in the Conference Hall of the “Dimiccoli” Hospital of Barletta (BT), in the Puglia region (South of Italy).
